### **Qualifications**

Creative artist with a firm understanding of real-time job and client demands. My abilities are built upon a solid foundation of traditional drawing, painting and graphic 2D design skills. My varied experience has made it possible to provide my clients with whatever solution is best for their needs whether it be traditional print or the latest in digital delivery rather than making software define the answer. The melding of both electronic and traditional art has given me the ability to completely realize my work from sketches to electronic media be it in Flash, PhotoShop or fully-textured 3D models and animations.

#### **2007-2008 Creative Director, MMG**

Creating GUIs for CD and DVD presentations of surgical procedures. Producing print ads for professional medical journals and miscellaneous collateral materials. Medical illustrations in PhotoShop and 3DS Max for electronic presentations.

#### **1999-2007 Owner, Atomic Art**

Currently working in a contractors basis for Amstan Logistics creating a new corporate identity and stylebook plus reworking their inter/intra/extranet into a contemporary look and a more streamlined mode by employing CSS standards. Teaching at UC twice a week as an adjunct professor on the subjects of 3D Modeling and Electronic Media. Recent freelance assignments have ranged from corporate sell sheets, 3D art for PowerPoint presentations for Hasbro and brochures for a local technology center. While in California from 2000-2004 I worked on a contractor basis for Electronic Arts/Maxis creating geometry and texture assets for The Sims: Bustin' Out.

#### **1996-1999 Art Director, PyroTechnix/Sierra OnLine**

Supervised a staff of four artists to finish "Return to Kronador" on its scheduled release date. Responsible for working with the Game Designer to help create and visualize new story concepts. Worked closely with the technical staff to produce test art for engine development. Attended weekly meetings to report on the Art Department's progress and

to keep abreast of Engineering requirements and advances. Created storyboards for interstitial cinemats and directed their creation.

**1994-1996 Digital Artist, Optimum Group**

Designed multimedia sales pieces for Procter & Gamble using PowerPoint and Flash. Directed photo shoots of products for print and electronic media. Designed and produced magazine and newspaper advertising under tight deadline constraints. Production of work from concept to final art including prepress and working with the printer for press checks and final approval.

**1988-1994 Creative Director, Ral Partha Enterprises, Inc.**

Managed a staff of three artists and four sculptors. Implemented the changeover from traditional art methods to a fully functional desktop publishing environment. Designed and supervised the creation of all packaging and collateral materials. Coordinated with publications for advertising art. Provided direction for the sculpting staff in both conceptualization and approval of final pieces. Design and managed annual 40 page catalog. Worked directly with printers for all phases of production. Directed photo shoots for advertising, packaging and catalogs.

**Education**
